Dear Ms. D'Auray;

I am writing to you today in regards to the Canadian Cut diamonds.

I feel it is very important to represent ourselves correctly and clearly with the public. Jewellery is a valuable commodity and comes at a good costly purchase price. The client is entitled and should receive full disclosure on the product and the product should be clearly labelled permanently for identification of authenticity.

I feel very strongly and with a great sense of pride that we should represent only diamonds that have been mined, cut and polished in Canada as being Canadian. All components must be done in Canada and identified so.

We want to give clients the peace of mind that the diamond does not come from a country where child labor/or war costs have been used to produce a product.

We should be CANADA PROUD and showcase our Canadian product only if all three elements have been met: meaning mined, cut and polished and identified permanently as CANADA MADE.

If you have any questions or comments please do not hesitate to contact me.

Regards,

Maureen Dunn
